40A McClean St, Blacktown, NSW | 0420201787 | kalyan.iitkgp08@gmail.com | [LinkedIn](#) | [Github](#)

Data Scientist | Machine Learning Engineer

Data-driven, action-oriented solutions to challenging business problems

Business-minded aspiring data scientist with demonstrated expertise in machine learning and optimization and ability to deliver valuable insights via data analytics and advanced data-driven methods. Strong math background and experience in data analysis, machine learning, and statistics. Passionate about explaining data science to non-technical business audience.

EXPERTISE

- Data and Quantitative Analysis
- Predictive Modeling
- Data-Driven Problem Solving
- Optimization
- Data Mining and Visualization Tools
- Machine Learning Algorithms
- Statistical Analysis
- Research, Reports and Forecasts

PROFESSIONAL EXPERIENCE

CANON INFORMATION RESEARCH SYSTEMS. (*CiSRA*)

Machine Learning Research Intern, 2017 to Present

Designing optimized deep neural network for action understanding from videos.

- ➔ Developed intricate algorithms based on deep-dive statistical analysis and machine learning that were used to optimize DNN for video understanding.
- ➔ Analyzed and processed complex video data sets using analytics tools.
- ➔ Implemented meta-learning systems in the context of DNNs to reach higher convergence.

Quantifiable results:

- Boosting performance of DNN by **30%** for complex benchmarks.
- Contributed to CiSRA's codebase and presented results within Canon audience from Canon Inc.
- Contributed to this year's project plan funded by stakeholders and customers.

THE UNIVERSITY OF NEW SOUTH WALES. (*ADFA*)

Research Assistant, 2015 to 2017

Develop efficient algorithm to tackle computationally expensive optimization problems.

- ➔ Developed complex frameworks to deal with surrogate assisted and multi-fidelity approaches.
- ➔ Analyzed and processed large data sets to find underlying relationship using state of the art methods.

Quantifiable results:

- Boosting performance of existing approaches by 60% using surrogates.
- Frameworks are being downloaded and used worldwide.
- Published in several top journal and conference outlets and delivered several talks worldwide.
- Attracted several domestic and international funding to travel and collaborate with well-known researchers from USA, UK, China and Japan.

Teaching Appointments: Tutored first year undergraduate defense students design optimization and CATIA (ZEIT 1501) in S2-2016 at UNSW Canberra at ADFA.

EDUCATION

THE UNIVERSITY OF NEW SOUTH WALES, CANBERRA | **Ph.D. in Computer Science** (ONGOING) |
M.Tech, IIT KHARAGPUR | **B.Tech**, IIT KHARAGPUR

OF NOTE

Data Analytics/Machine Learning Tools/Languages: TensorFlow, Keras, Sonnet, Theano, CUDA, GPU, R, Python, MATLAB, SQL (ongoing), Hadoop (ongoing), C++, Microsoft Office, LaTeX

Publications and Presentations: Available at [Google Scholar](#).
